Mémoire

Pour l'obtention du diplôme de Master

Filière: **Informatique**

Spécialité: **Ingénierie des Systèmes Informatiques (ISI)**

Dans le cadre d'un diplôme - une startup / un diplôme - un brevet

Titre du Projet

NEW TRENDS IN IOT BASED SMART PARKING

Présenté par:

BELFAR Ilyas

Soutenu le : 08/07/2023

Devant le juré composé de :

- M. BENDAOUD Fayssal : Président
- M. AWAD Samir : Examineur
- Mme. BOUABDELLAH Wassila : Examineur
- M. BENSENANE Hamdane : Encadrant
- M. RAHMOUN Abdellatif : Co-Encadrant

Année Universitaire : 2022 - 2023

Urban areas around the world experience constant exponential population growth and an increasing number of vehicles on the streets, and as a result, traditional parking operators with their classic infrastructure that requires a lot of human intervention are struggling to meet this enormous demand.

Faced with this problem, one can only think of an intelligent parking system as a solution, and thanks to IoT technology, this solution is easy to implement and easier to use. IoT Intelligent parking systems use a variety of devices and technologies such as sensors, connectivity, and data analysis.

These systems enable real-time monitoring of parking spaces and provide accurate information about availability and occupancy. Drivers can access current parking data via mobile apps or electronic signage, enabling them to quickly find free parking spaces and reduce unnecessary search times. This not only increases driver comfort but also reduces traffic congestion, lowers carbon emissions, and optimizes fuel consumption.

Key words: Parking System, Connected Objects, IoT, Smart City, Automation, Assessment, System Architecture, Urban Mobility, Parking Management, Evaluation.

THANKS AND ACKNOWLEDGEMENTS

I thank **Almighty Allah** for granting me good health and the determination to start and complete this thesis. Firstly, this work would not have come to fruition without the assistance and guidance of **Mr. RAHMOUNE Abdellatif** and **Mr. BENSENANE Hamdane**. I express my gratitude to them for the quality of their supervision, their patience, diligence, and availability during the preparation of my thesis. I am aware of the honor bestowed upon me by the jury members for accepting to examine and evaluate my work. My appreciation also extends to all my teachers who have provided me with high-level education, despite their academic and professional responsibilities.

I would also like to express my deep gratitude to my parents, brothers, sisters, and deceased grandparents, who have always been my unwavering pillars of support. Their love, encouragement, and sacrifices have been an endless source of motivation and strength throughout this journey. Their constant presence and support have been a blessing to me, and I am immensely grateful to them.

Lastly, my heartfelt thanks go to all those who have contributed, directly or indirectly, to the completion of this thesis. Whether they are members of my extended family, close friends, or colleagues, their moral support, valuable advice, and encouragement have been of utmost importance. I am honored to have relied on their support through-

out this academic voyage, and I am deeply thankful for their presence by my side.

May everyone find in this work a testament to my deep gratitude and sincere appreciation.

- BELFAR Ilyas.

DEDICATED

*To my parents, **Mahmoud and Sorya**, and my brother and sisters, for their immeasurable support and moral encouragement. Their unwavering belief in me has always fueled my determination to succeed and fulfill myself. No dedication can adequately express my gratitude and love.*

*In loving memory of my two grandparents. To all my family and loved ones, as well as my colleagues **M. Ziane and M. Segouat**, and to everyone who has contributed directly or indirectly to the completion of this work. May this work be the realization of your wishes and the result of your unwavering support.*
